

LEA COUNTY

Residential Development Package

LEA COUNTY

Residential Development Package

Welcome to Lea County, New Mexico!

With the influx of new industry and business development to the region and a population that continues to increase, it is an exciting time to do business in Lea County. Hobbs was cited by Forbes as one of the fastest growing small communities in the nation with a population that has increased by over 19% since the 2000 Census. The County as a whole has grown by nearly 17%. This rapid growth has created an opportunity for the immediate development of housing units in every community in Lea County.

In addition to the current demand for housing, there is a significant need for additional housing units to support planned future industrial development. The Economic Development Corporation of Lea County (EDCLC) has successfully attracted several new industries to locate in this area that will create over 850 direct jobs and more than 1,000 indirect jobs by 2015. One of our initiatives is to encourage housing developers and contractors to invest in projects in Lea County.

This brochure will provide you with some preliminary information showing **COMMUNITY PROFILES**, **HOUSING NEEDS DATA**, **ZONING/AVAILABLE LAND**, **INCENTIVES**, **NEW BUSINESS DEVELOPMENTS**, **WORKFORCE INFORMATION**, **CONTRACTOR CONTACTS** and **IMPORTANT CONTACT INFORMATION**. If you have any questions as you review this information, please feel free to contact the EDCLC.

We hope that you will consider the potential benefits of doing business in Lea County during this remarkable period of growth.

Sincerely,

Lisa Hardison

President & CEO

Economic Development Corporation of Lea County

EUNICE

Eunice grew 14% since the last census and has a current population of 3,220 people. Home to URENCO USA's National Enrichment Facility, Eunice's business friendly environment is creating a resurgence of new business development with the addition of Outlaw Grill, H&R Block, JP Stone Bank, Palenteria Azteca, a pharmacy and Parker Energy to the Community. The Eunice Municipal School District recently completed additions to their schools and has record enrollment numbers for the 2012-2013 school year. The largest employers in Eunice: URENCO USA, B&H Construction, Chaparral Service Inc, Chevron USA INC, Eunice Well Servicing Company, Family Dollar Store, Transwestern Pipeline Company, and Eunice Municipal Schools. Recreation opportunities in Eunice: city parks, youth center, senior center, golf courses, city pool and waterslides, community events, and many more.

HOBBS

Hobbs is the largest city in southeastern NM, and serves as the retail center for an area encompassing some 125,000 residents within a 55-mile radius. With a current population of over 43,000, Hobbs has grown more than 19% since the last census and is rapidly attracting new retail and industrial growth. New companies that have located in Hobbs include: International Isotopes Inc, Joule Unlimited, Bloom Retail Center, United Airlines, Lowes, Hibbet Sports, Intercontinental Potash Corporation, Nova Mud, and a host of retail and accommodation facilities. The largest employers in Hobbs are: Hobbs Municipal Schools, Lea Regional Medical Center, Halliburton, Walmart, RWI Construction, Zia Racetrack and Black Gold Casino, Geo Group and New Mexico Junior College. Recreational opportunities in Hobbs: gaming, horse racing, drag racing, sky diving, parks, pools with waterslides, dog park, golf courses, walking trails, fishing, Western Heritage Museum, community theater, teen center, community events, concerts, rodeo, etc.

JAL

Jal sits in the southeast corner of Lea County and has a population of 2,175. Jal continues to grow and has attracted several new businesses to the area including: SunEdison, Eldorado Biofuels, a fuel station, Family Dollar Store, and a new restaurant. The largest employers in Jal are: Jal Public Schools, Merryman Construction Co, Quatro Trucking, Panther Energy, Southern Union Gas Services, Lake Quality Trucking, Fulco Trucking, and Family Dollar. Recreational opportunities in Jal: Woolworth Library, Jal Lake, Cowboy Days Festival, Jal-A-Rama, golf courses, and other community celebrations.

LOVINGTON

Lovington is the county seat and has a population of 14,624 which is an increase of 16% since the last census. Several new businesses have located or opened additional offices in Lovington including LEACO, Gebo's, Wildcat Wind, and Exelon Energy. The largest employers in Lovington are: Lovington Public Schools, Nor Lea Hospital, Ferguson Construction Company, Lea County Electric Cooperative, Gandy Oilfield Services, Gilbert Lease Services, Caprock Pipe and Supply, LEACO, and Navajo Refinery. Recreational opportunities in Lovington: Chaparral Park, Lea County Fair, pool and waterslides, fishing, skate park, Lea County Museum, historic Lea Theater, teen center, rodeo, "World's Greatest Lizard Race", electric light parade and other community events.

TATUM

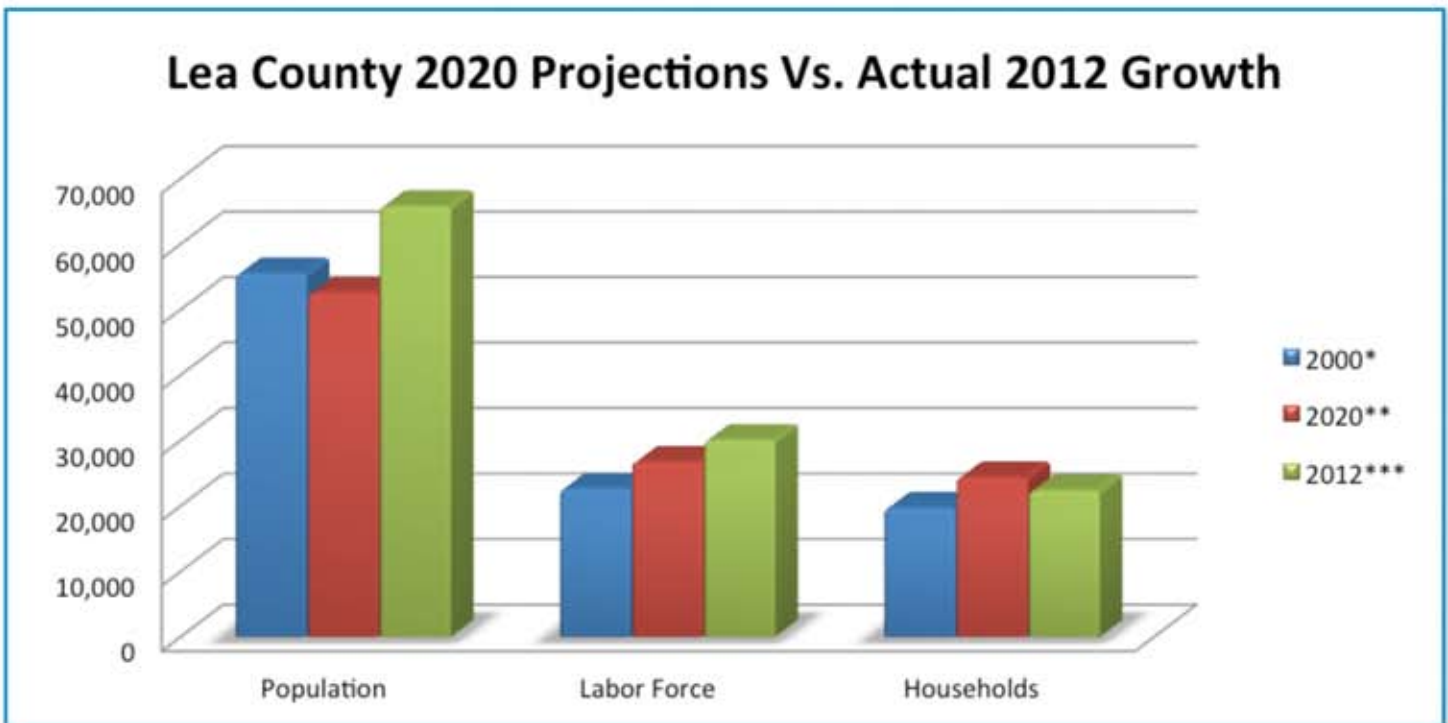

Tatum grew 16.8% since the last census and has a population of 1,403. Tatum is conveniently located at the crossroads of New Mexico highways 380 and 206. The town of Tatum has recently refurbished several of the city's buildings and is preparing for the future expansion of their community. The largest employers in Tatum are: Tatum Public Schools, Gourmet Seed International, Cogburn Pipe and Supply Inc., Conoco Phillips Pipe Line Company, and Gandy Corporation. Recreational opportunities in Tatum include: community library, camping, hiking, parks, community events and is in close proximity to many national parks.

Summary of Hobbs Housing Needs 2009 to 2015

Since 2000, Lea County's population has grown 18% and the labor force has increased by more than 30%. This growth will continue with the new projects slated to begin operations in the near future (see New Business Developments). **More than 4,000 housing units are needed to meet the current and future demand for housing.**

A study completed by urban economists evaluated the housing market in Lea County and made long-term projections for the housing needs through the year 2020. The study looked at population and employment growth to estimate the number of housing units that were needed. **In 2012, Lea County surpassed the 2020 growth predictions.**

Source

*2000 Data: US Census Bureau

**2020 Projections: An Assessment of Lea County Housing Needs, Gruen Gruen & Associates, 2005.

***2012 Estimates: Experian, Inc. All rights reserved, Alteryx Inc.

The study, using the growth estimates above, determined that 5,200 housing units were needed by 2020 (304 housing units needed per years for 2005-2009 and 370 units for years 2010-2020). Only 46% of the projected housing units needed for 2005-2009 were built, resulting in a deficit of over 1,400 housing units needed to catch-up to current demand.

Projected Housing Needs Compared to Housing Units Actually Built

	Projected Need*	Actually Built**	Deficit
Lea County Housing Units Needed 2005-2012	2,630	1,207	1,423
Lea County Housing Units Needed 2012-2020	2,590		2,590
Total Units Needed by 2020	5,220		4,013

Source

*An Assessment of Lea County Housing Needs, Gruen Gruen & Associates, 2005.

**Self reported by each municipality

The chart below details the number of housings units actually built annually versus the projected need for Lea County.

Source

*An Assessment of Lea County Housing Needs, Gruen Gruen & Associates, 2005.

**Self reported by each municipality

An additional housing needs assessment completed for Hobbs confirms this data and showed that in Hobbs alone nearly 1,000 housing units were needed to catch-up and a total of more than 2,200 units will be needed by 2015.

Hobbs Housing Unit Needs

Catch-Up Current Needs*	992
Keep-Up Future Needs,** 2009-2015	1,128-1,271
Total	2,120-2,263

Source:

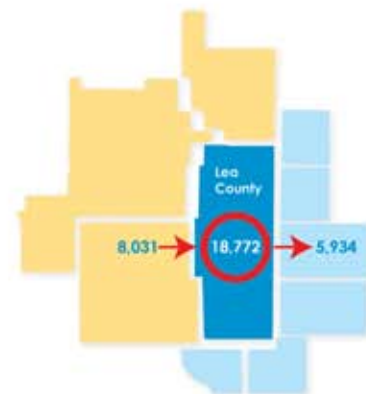

*Catch-Up Needs (over crowded units and in-commuters): City of Hobbs Housing Needs Assessment, RRC Associates, Inc. 2009.

**Keep-Up Needs (replacement retirees for 2009-2015 and new jobs 2012-2015): City of Hobbs Housing Needs Assessment, RRC Associates, Inc. 2009. Updated job creation numbers: The Economic Impact of the Economic Development Corporation of Lea County, Impact Data Source, 2012.

Additional in-commuter demand can be seen in the 2010 Census information that shows over 8,000 workers commute into Lea County to work.

HOBBS HOUSING INCENTIVES

The City of Hobbs is offering the following incentives for developer expenses related to installing new public infrastructure, streets, curbing, sidewalk, and water and sewer mains installed by the developer at pre-approved city prices, on a per unit basis.

“Single Family Housing” (SFH) is defined as a permanently constructed/installed, rental or “For Sale” housing development in Hobbs in any combination of Modular, Manufacture, Site Built or total Renovation of existing vacant residences.

“Market-Rate Rental Housing” (MRH) is defined as a permanently constructed, rental housing development in Hobbs that does not offer or provide any housing units with a subsidized or reduced rent payment based on the level of income of the household renting the unit.

Incentive Award Amounts

- South of Sanger Street: Up to \$20 per square foot of finished living space, max \$20,000 per unit or \$500,000 per proposal (\$15 per square foot for MRH, with max of \$750,000 per proposal)
- North of Sanger Street: Up to \$10 per square foot of finished living space, max \$10,000 per unit or per proposal \$500,000

Program Requirements

- Minimum of 4 housing units per project location and must be fully served by infrastructure
- Infill infrastructure improvements will be funded to provide new or replacement water or sewer facilities, curbing, sidewalk, street improvements and paving, if additional housing is proposed as the project.
- Full developer financing for 100% of project must be in place prior to award of the proposals.
- The design of the project must be complete within 90 days of award of the contract with the City.
- Construction/Installation must be 50% complete within six months of award, with total completion within 1 year following award of the contract. Completion date may be extended for projects exceeding 20 units.

To request a copy of the City of Hobbs Request for Proposals #443-12 (SFH) and #440-11 (MRH) for complete requirements and proposal details, please contact Kevin Robinson with the City of Hobbs Planning Department.

Permitting and Impact Fees

None of the communities in Lea County have impact fees. The permitting process may vary for each community, please contact the community representatives listed in this packet for more information.

“NONE OF THE
COMMUNITIES IN
LEA COUNTY HAVE
IMPACT FEES.”

NEW BUSINESS DEVELOPMENT IN THE ENERGYPLEX

Lea County has historically been known for its oil and gas production. Hobbs and the surrounding areas have served as a “real world” laboratory for the numerous petroleum companies that have been working to solve their industry’s needs for several decades. Knowing that the economy must be diversified to remain vibrant, the EDCLC has worked with the County of Lea and the City of Hobbs to attract new industries and recently branded the county as the “EnergyPlex”. This approach to focus on energy-related projects has helped the EDCLC, County and City be successful in recruiting a wide variety of new innovative and technology driven industries to the area. Below are just some of the projects that have recently announced or located in Lea County.

energyplexnm.com

International Isotopes, Inc (INIS): In March 2009, INIS announced their decision to locate a Depleted Uranium Deconversion and Fluorine Extraction Facility in Lea County. Their products can be used in petroleum operations, photovoltaic solar cells, and refrigerant and aluminum production. Construction on the facility is expected to begin in late 2012. This \$115 Million facility will employ between 125-150 full-time employees plus additional construction jobs.

intisoid.com

Joule Unlimited: Joule is the pioneer of Liquid Fuel from the Sun, enabling direct, continuous conversion of sunlight and waste CO₂ to infrastructure-ready fuels and chemicals at virtually unlimited scale and stable, competitive costs. The phase one, small scale, commercial facility is already in production west of Hobbs. Phase one, a \$20 million investment, employs 20 people and could increase to 100 during the next phase.

jouleunlimited.com

Intercontinental Potash Corporation (ICP): A world-class potash find has been identified in Lea County. This potash formation has the potential to produce over 700 million tons of polyhalite, to be mined over a 75-year period. Polyhalite is used as a fertilizer and has low or no chlorides, which makes it highly valuable for use on crops that have a low tolerance for chlorides. Currently preparing their environmental impact analysis, ICP anticipates an operational mine by 2014/2015. When at full scale operations, the \$1 Billion ICP mine could employ up to 450 full time employees.

icpotash.com

United Airlines: Daily flights between Hobbs and Houston started in July 2011 via United ExpressJet. These flights are within a 90 minute connection time of over 200 world-wide destinations. The county and airport management are currently exploring additional flight service options to Albuquerque and other westward locations.

flyhobbs.com or united.com

Exelon Energy: This wind project recently completed a \$54 million, 24 MW wind turbine array. The power will feed into Lea County Electric Cooperative's power grid.

lcecnecnet.com

Eldorado Bio-Fuels: Eldorado Bio-Fuels is a leading company in the areas of industrial waste water treatment, algae cultivation and bio-fuel production. This Santa Fe headquartered company has partnerships with the National Alliance for Advanced Bio-fuels and Bio-products, the Los Alamos National Labs, VM Technologies and other private and commercial oil and gas companies. Eldorado has a demonstration facility in the EnergyPlex and hopes to commercialize their production in the near future.

eldoradobiofuels.com

NEW BUSINESS DEVELOPMENT IN THE ENERGYPLEX

AeonClad: Through a partnership between Emergent Technologies, Inc. and Lea County to identify technologies that can be commercialized, a new project is nearly ready to begin operations in Lea County. AeonClad coats feathers to make them water resistant and will be used in lining for cold weather gear. This is just the first of the “research to commercialization” projects that have been realized from the County/ETI partnership.

aeonclad.com

URENCO USA National Enrichment Facility: URENCO USA is a nuclear-related facility that enriches uranium to be used as fuel in nuclear power plants all over the world. In June, 2010, URENCO USA commenced operations of their uranium enrichment facility. They will continue construction until they reach their target capacity of 5.7 million SWU. When completed, this facility will supply 50% of the nation’s enriched uranium needs. This is a multi-billion dollar project that employs approximately 350 employees and supports between 600-900 ongoing construction jobs.

urengo.com

SunEdison: In December 2011, SunEdison completed work on a 50MW photovoltaic solar deployment in Lea and Eddy Counties. Each of the 5 sites has a 10 MW solar array, with four sites in Lea County and one site in Eddy County. The solar arrays will generate enough energy to power more than 192,000 homes for a year. This is one of the largest photovoltaic projects in North America

and has put Lea County on the World’s solar map.

sunedison.com

Petroleum Industry Expansions: Due to advances in hydrofracking and horizontal drilling, the Permian Basin is experiencing a resurgence of petroleum activities. Several companies, including international manufacturers are exploring the potential of locating new or expanding existing facilities in the EnergyPlex.
